#### **Situational Awareness**

Additional information and analysis is available for Disaster Management Professionals. If you are a Disaster Management Professional and would like to apply for access, please register here. Validation of registration information may take 24-48 hours.

#### **Current Hazards:**

Active Drought							
Event	Severity	Date (UTC)	Name	Lat/Long			
	0	06-Dec-2017 23:05:30	Drought - Arkansas, United States	34.41° N / 93.62° W			

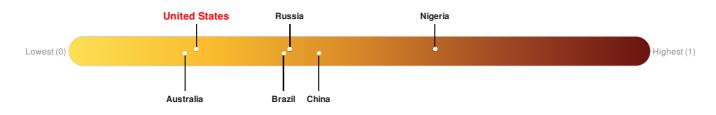

Active Tornado							
Event	Severity	Date (UTC)	Name	Lat/Long			
	0	22-Jan-2018 08:57:18	Tornado - Shreveport, LA WFO Region, US	31.57° N / 92.76° W			
	1	22-Jan-2018 04:03:25	Tornado - Shreveport, LA WFO Region, US	32.18° N / 92.8° W

## Lack of Resilience Index:

The Lack of Resilience Index assesses the susceptibility to impact and the short-term inability to absorb, respond to, and recover from disruptions to a country's normal function.

United States ranks 149 out of 165 countries assessed for Lack of Resilience. United States is less resilient than 10% of countries assessed. This indicates that United States has low susceptibility to negative impacts, and is less able to respond to and recover from a disruption to normal function.

#### **Regional Overview**

Additional information and analysis is available for Disaster Management Professionals. If you are a Disaster Management Professional and would like to apply for access, please register here. Validation of registration information may take 24-48 hours.

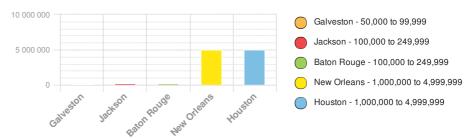

## **Population Data:**

## 2011

Total: 13, 272, 476

Max Density: 37, 392(ppl/km<sup>2</sup>)

# **Populated Areas:**

# **Risk & Vulnerability**

Additional information and analysis is available for Disaster Management Professionals. If you are a Disaster Management Professional and would like to apply for access, please register here. Validation of registration information may take 24-48 hours.

## Multi Hazard Risk Index:

The Multi Hazard Risk index assesses the likelihood of losses or disruptions to a country's normal function due to the interaction between exposure to multiple hazards (tropical cyclone winds, earthquake, flood and tsunami), socioeconomic vulnerability, and coping capacity

Multi-Hazard Exposure United States ranks 121 out of 165 countries assessed for Multi Hazard Risk. United States has a Multi Hazard Risk higher than 27% of countries assessed. This indicates that United States has less likelihood of loss and/or disruption to normal function if exposed to a hazard.
