Lack of Resilience Index:

Lack of Resilience represents the combination of susceptibility to impact and the relative inability to absorb, respond to, and recover from negative impacts that do occur over the short term. **Angola** ranks **26** out of **165** on the Lack of Resilience index with a score of 0.58. **Namibia** ranks **64** out of **165** on the Lack of Resilience index with a score of 0.46.

Angola ranks **26** out of **165** on the Lack of Resilience Index. Based on the sub-component scores related to Vulnerability and Coping Capacity, the three thematic areas with the weakest relative scores are Population Pressures, Vulnerability Health Status and Infrastructure.

Namibia ranks **64** out of **165** on the Lack of Resilience Index. Based on the sub-component scores related to Vulnerability and Coping Capacity, the three thematic areas with the weakest relative scores are Info Access Vulnerability, Population Pressures and Vulnerability Health Status.

Risk & Vulnerability

Additional information and analysis is available for Disaster Management Professionals. If you are a Disaster Management Professional and would like to apply for access, please [register here](#). Validation of registration information may take 24-48 hours.

Multi Hazard Risk Index:

Angola ranks 53 out of 165 on the Multi-Hazard Risk Index with a score of 0.54. Angola is estimated to have relatively medium overall exposure, medium vulnerability, and low coping capacity.

Namibia ranks 81 out of 165 on the Multi-Hazard Risk Index with a score of 0.49. Namibia is estimated to have relatively medium overall exposure, medium vulnerability, and medium coping capacity.
