Lack of Resilience Index:

The Lack of Resilience Index assesses the susceptibility to impact and the short-term inability to absorb, respond to, and recover from disruptions to a country's normal function.

Equatorial Guinea ranks **56** out of **165** countries assessed for Lack of Resilience. Equatorial Guinea is less resilient than 67% of countries assessed. This indicates that Equatorial Guinea has medium susceptibility to negative impacts, and is more able to respond to and recover from a disruption to normal function.

Cameroon ranks **15** out of **165** countries assessed for Lack of Resilience. Cameroon is less resilient than 91% of countries assessed. This indicates that Cameroon has high susceptibility to negative impacts, and is more able to respond to and recover from a disruption to normal function.

Nigeria ranks **12** out of **165** countries assessed for Lack of Resilience. Nigeria is less resilient than 93% of countries assessed. This indicates that Nigeria has high susceptibility to negative impacts, and is more able to respond to and recover from a disruption to normal function.

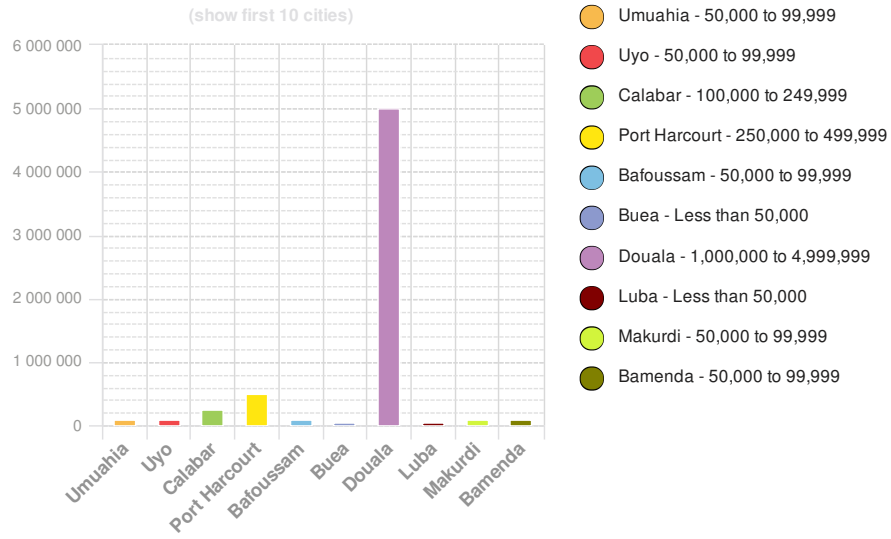
Populated Areas:



Risk & Vulnerability

Additional information and analysis is available for Disaster Management Professionals. If you are a Disaster Management Professional and would like to apply for access, please register here. Validation of registration information may take 24-48 hours.

Multi Hazard Risk Index:

The Multi Hazard Risk index assesses the likelihood of losses or disruptions to a country's normal function due to the interaction between exposure to multiple hazards (tropical cyclone winds, earthquake, flood and tsunami), socioeconomic vulnerability, and coping capacity

Multi-Hazard Exposure **Equatorial Guinea** ranks **77** out of **165** countries assessed for Multi Hazard Risk. Equatorial Guinea has a Multi Hazard Risk higher than 54% of countries assessed. This indicates that Equatorial Guinea has more likelihood of loss and/or disruption to normal function if exposed to a hazard.

Multi-Hazard Exposure **Cameroon** ranks **18** out of **165** countries assessed for Multi Hazard Risk. Cameroon has a Multi Hazard Risk higher than 90% of countries assessed. This indicates that Cameroon has more likelihood of loss and/or disruption to normal function if exposed to a hazard.

Multi-Hazard Exposure **Nigeria** ranks **12** out of **165** countries assessed for Multi Hazard Risk. Nigeria has a Multi Hazard Risk higher than 93% of countries assessed. This indicates that Nigeria has more likelihood of loss and/or disruption to normal function if exposed to a hazard.

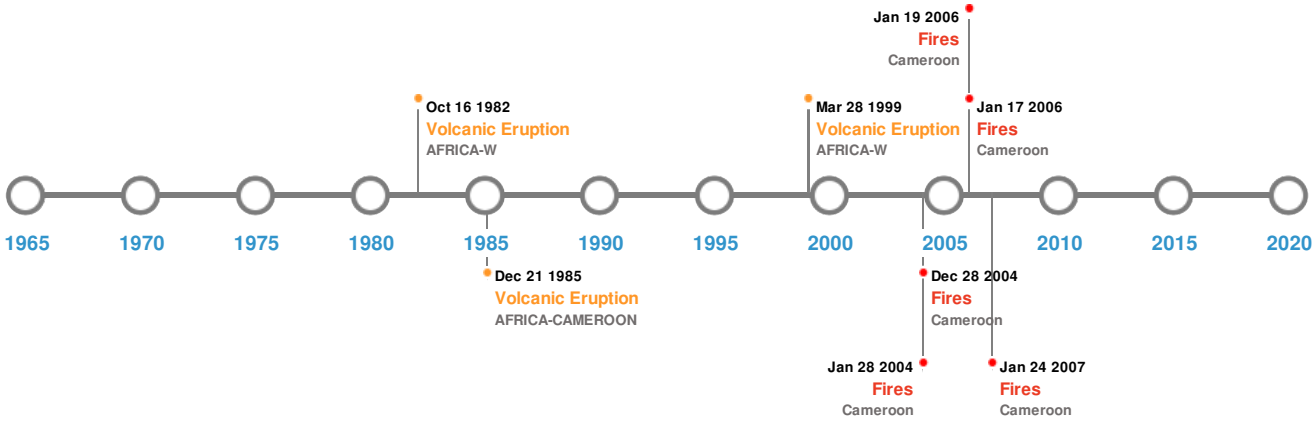
Historical Hazards

Additional information and analysis is available for Disaster Management Professionals. If you are a Disaster Management Professional and would like to apply for access, please register here. Validation of registration information may take 24-48 hours.

Historical Hazards:



Earthquakes:

5 Largest Earthquakes (Resulting in significant damage or deaths)

Event	Date (UTC)	Magnitude	Depth (Km)	Location	Lat/Long
	26-Apr-1909 00:00:00	0.00	-	CAMEROON: BUEA	4.2° N / 9.2° E

Source: Earthquakes

Volcanic Eruptions:

5 Largest Volcanic Eruptions (Last updated in 2000)

Event	Name	Date (UTC)	Volcanic Explosivity Index	Location	Lat/Long
	LAKE NYOS	21-Aug-1986 00:00:00	3.00	AFRICA-CAMEROON	6.43° N / 10.3° E
	CAMEROON, MOUNT	01-Jan-1807 00:00:00	3.00	AFRICA-W	4.2° N / 9.17° E
	CAMEROON, MOUNT	01-Jan-1650 00:00:00	3.00	AFRICA-W	4.2° N / 9.17° E
	CAMEROON, MOUNT	28-Mar-1999 00:00:00	2.00	AFRICA-W	4.2° N / 9.17° E
	CAMEROON, MOUNT	16-Oct-1982 00:00:00	2.00	AFRICA-W	4.2° N / 9.17° E

Disclosures

* As defined by the source (Dartmouth Flood Observatory, University of Colorado), Flood Magnitude = LOG(Duration x Severity x Affected Area). Severity classes are based on estimated recurrence intervals and other criteria.
