

**Region Selected** » Lower Left Latitude/Longitude: -31.0684 N° , -66.2543 E°  
 Upper Right Latitude/Longitude: -25.0684 N° , -60.2543 E°

### Situational Awareness

Additional information and analysis is available for Disaster Management Professionals. If you are a Disaster Management Professional and would like to apply for access, please [register here](#). Validation of registration information may take 24-48 hours.

### Current Hazards:

#### Recent Earthquakes

| Event | Severity | Date (UTC)           | Magnitude | Depth (km) | Location | Lat/Long            |
|-------|----------|----------------------|-----------|------------|----------|---------------------|
|       |          | 20-Jul-2018 11:06:24 | -         | -          | -        | 28.07° S / 63.25° W |

### Lack of Resilience Index:

The Lack of Resilience Index assesses the susceptibility to impact and the short-term inability to absorb, respond to, and recover from disruptions to a country's normal function.

**Argentina** ranks **92** out of **165** countries assessed for Lack of Resilience. Argentina is less resilient than 45% of countries assessed. This indicates that Argentina has low susceptibility to negative impacts, and is less able to respond to and recover from a disruption to normal function.

## Risk & Vulnerability

Additional information and analysis is available for Disaster Management Professionals. If you are a Disaster Management Professional and would like to apply for access, please [register here](#). Validation of registration information may take 24-48 hours.

## Multi Hazard Risk Index:

The Multi Hazard Risk index assesses the likelihood of losses or disruptions to a country's normal function due to the interaction between exposure to multiple hazards (tropical cyclone winds, earthquake, flood and tsunami), socioeconomic vulnerability, and coping capacity

Multi-Hazard Exposure **Argentina** ranks **81** out of **165** countries assessed for Multi Hazard Risk. Argentina has a Multi Hazard Risk higher than 51% of countries assessed. This indicates that Argentina has more likelihood of loss and/or disruption to normal function if exposed to a hazard.

### Wildfires:

#### 5 Largest Wildfires

| Event   | Start/End Date(UTC)                         | Size (sq. km.) | Location  | Mean Lat/Long       |
|---|---|----------------|-----------|---------------------|
|  | 29-Aug-2008 02:55:00 - 04-Sep-2008 05:30:00 | 65.00          | Argentina | 30.83° S / 64.4° W  |
|   | 13-Jul-2004 00:00:00 - 20-Nov-2004 00:00:00 | 22.20          | Argentina | 28.43° S / 62.35° W |

| Event   | Start/End Date(UTC)                         | Size (sq. km.) | Location  | Mean Lat/Long       |
|---|---|----------------|-----------|---------------------|
|  | 28-Sep-2002 00:00:00 - 09-Oct-2002 00:00:00 | 21.70          | Argentina | 30.9° S / 64.79° W  |
|  | 11-Oct-2002 00:00:00 - 14-Oct-2002 00:00:00 | 21.60          | Argentina | 28.65° S / 66.2° W  |
|  | 17-Jan-2003 00:00:00 - 29-Jan-2004 00:00:00 | 18.50          | Argentina | 26.38° S / 61.81° W |

## Disclosures

\* As defined by the source ([Dartmouth Flood Observatory](#), University of Colorado), Flood Magnitude = LOG(Duration x Severity x Affected Area). Severity classes are based on estimated recurrence intervals and other criteria.
