Lack of Resilience Index:

Lack of Resilience represents the combination of susceptibility to impact and the relative inability to absorb, respond to, and recover from negative impacts that do occur over the short term. **Bosnia & Herzegovina** ranks **90** out of **165** on the Lack of Resilience index with a score of 0.4. **Croatia** ranks **132** out of **165** on the Lack of Resilience index with a score of 0.27. There was insufficient data to determine the Lack of Resilience Index score for **Vatican City**. **Italy** ranks **129** out of **165** on the Lack of Resilience index with a score of 0.28. There was insufficient data to determine the Lack of Resilience Index score for **San Marino**. **Slovenia** ranks **149** out of **165** on the Lack of Resilience index with a score of 0.22.

Bosnia & Herzegovina ranks **90** out of **165** on the Lack of Resilience Index. Based on the sub-component scores related to Vulnerability and Coping Capacity, the three thematic areas with the weakest relative scores are Environmental Capacity, Recent Disaster Impacts and Governance.

Croatia ranks **132** out of **165** on the Lack of Resilience Index. Based on the sub-component scores related to Vulnerability and Coping Capacity, the three thematic areas with the weakest relative scores are Marginalization, Environmental Capacity and Governance.

There was insufficient data to determine the Lack of Resilience Index score for **Vatican City**.

Italy ranks **129** out of **165** on the Lack of Resilience Index. Based on the sub-component scores related to Vulnerability and Coping Capacity, the three thematic areas with the weakest relative scores are Marginalization, Environmental Stress and Recent Disaster Impacts.

There was insufficient data to determine the Lack of Resilience Index score for **San Marino**.

Slovenia ranks **149** out of **165** on the Lack of Resilience Index. Based on the sub-component scores related to Vulnerability and Coping Capacity, the three thematic areas with the weakest relative scores are Environmental Stress, Recent Disaster Impacts and Infrastructure.

Multi Hazard Risk Index:

Bosnia & Herzegovina ranks **77** out of **165** on the Multi-Hazard Risk Index with a score of 0.5. Bosnia & Herzegovina is estimated to have relatively high overall exposure, low vulnerability, and medium coping capacity.

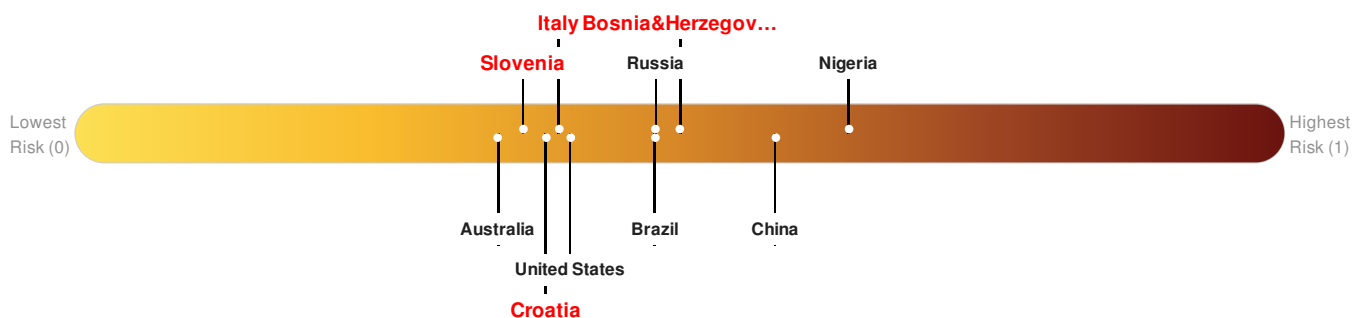

Croatia ranks **127** out of **165** on the Multi-Hazard Risk Index with a score of 0.39. Croatia is estimated to have relatively high overall exposure, low vulnerability, and high coping capacity.

Italy ranks **124** out of **165** on the Multi-Hazard Risk Index with a score of 0.4. Italy is estimated to have relatively high overall exposure, low vulnerability, and high coping capacity.

Slovenia ranks **138** out of **165** on the Multi-Hazard Risk Index with a score of 0.37. Slovenia is estimated to have relatively high overall exposure, very low vulnerability, and high coping capacity.

There was insufficient data to determine the Multi Hazard Risk Index score for **San Marino**.

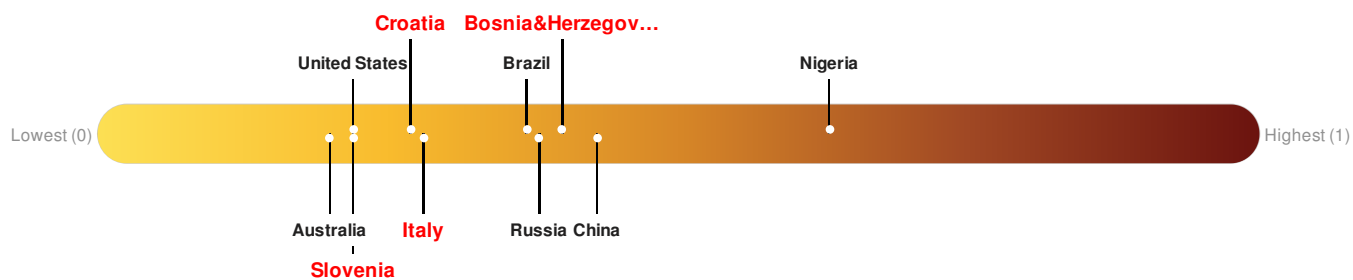

There was insufficient data to determine the Multi Hazard Risk Index score for **Vatican City**.
